## 4-in-1 protector for textiles

protects against water, oil, grease and dirt

300 ml e 405 UK 3

### HG 4-in-1 protector for textiles

- protects against water, oil, grease and dirt

With *HG 4-in-1 protector for textiles* you can protect your valuable textiles effectively and easily. Besides the strong water repellent effect of this product *HG 4-in-1 protector for textiles* prevents dirty oil, sauce- and wine spots, etc. as well. Spillages with these liquids can easily be removed, after treatment, with an absorbent tissue. *HG 4-in-1 protector for textiles* can be used for many applications. For instance, rain and sportswear, linen shoes, socks, garden cushions, tents, parasols, furniture, curtains etc. will be water repellent and protected at the same time by using *HG 4-in-1 protector for textiles*.

**Directions for use:** Avoid breathing spray. Use only outdoors or in a well-ventilated area. Test on an inconspicuous area to check for colour-fastness. Do not treat if the colour runs. The material to be treated should be clean and dry. If the material to be treated is already coated, this may reduce the performance of the product. Keep the can upright and spray evenly from a distance of about 20 cm onto the surface to be treated. Avoid excessive over application (saturation). After drying for about one hour the treated material will be perfectly protected and ready to use. To ensure maximum ongoing protection, we recommend repeating the treatment occasionally.

**Coverage:** The contents of the can is sufficient for approx. 3,5 m<sup>2</sup> textiles.
